Millions of the world's coolest rewards

At the heart of the Sierra AI-driven storefront is a vast collection of the world's most desired rewards. Top brands like Apple, Sony and Bose, amazing travel escapes, last minute concerts, events, and millions of other rewards in over 185 countries.

AI-triggered promotions and messaging

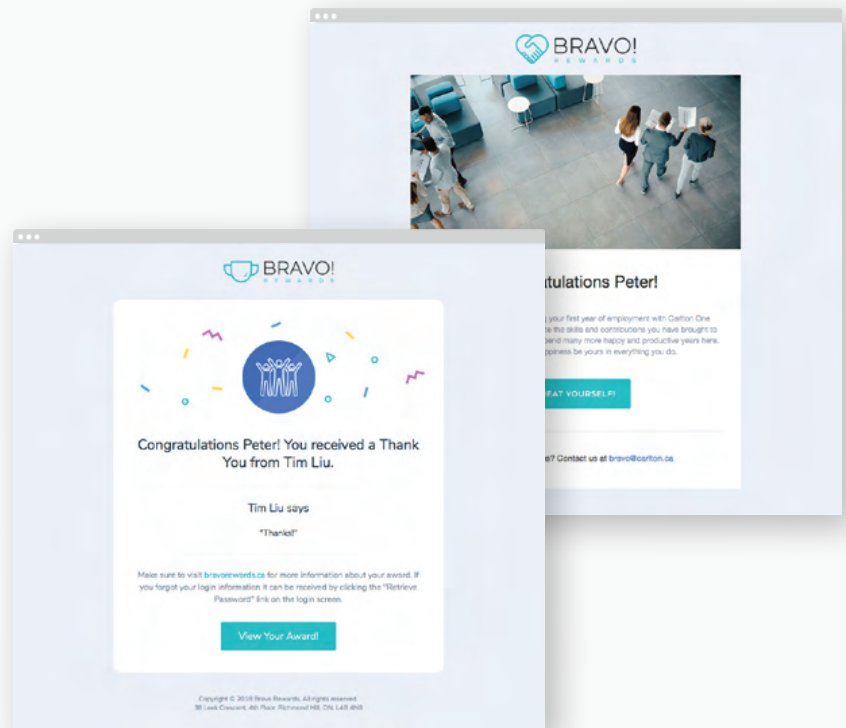

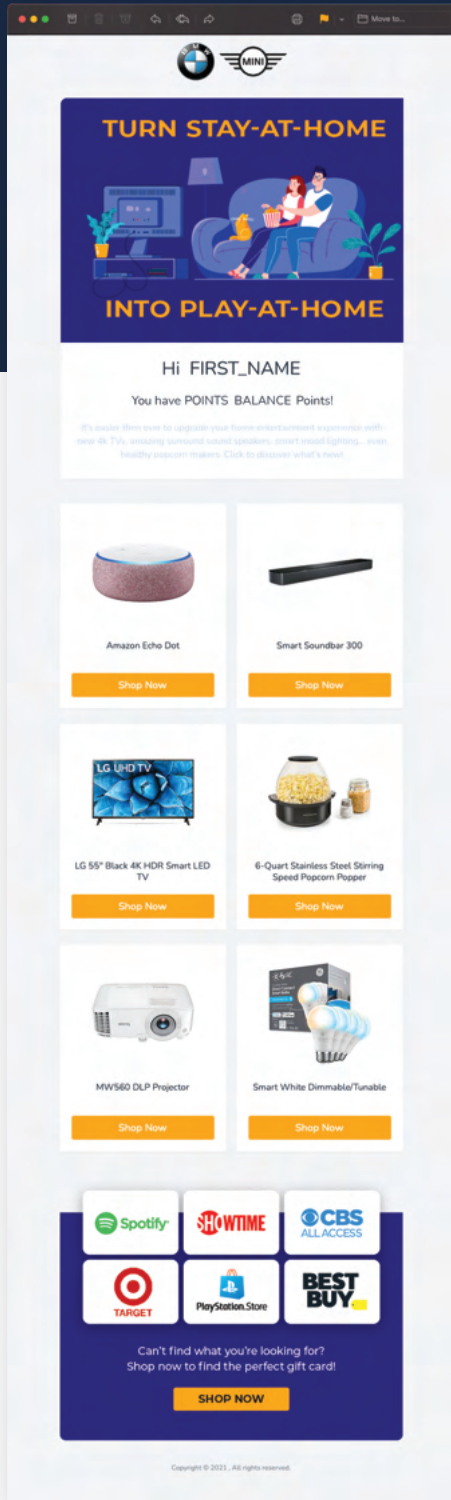

Your engagement program should be smart enough to sense when employee motivation and redemptions are dipping, and actually do something about it. Our new platform enables AI-triggered promotional campaigns, push notifications, reward recommendations and other timely, relevant communications.

Businesses thrive by empowering their people to change the world. Every SIERRA transaction funds 5 trees.

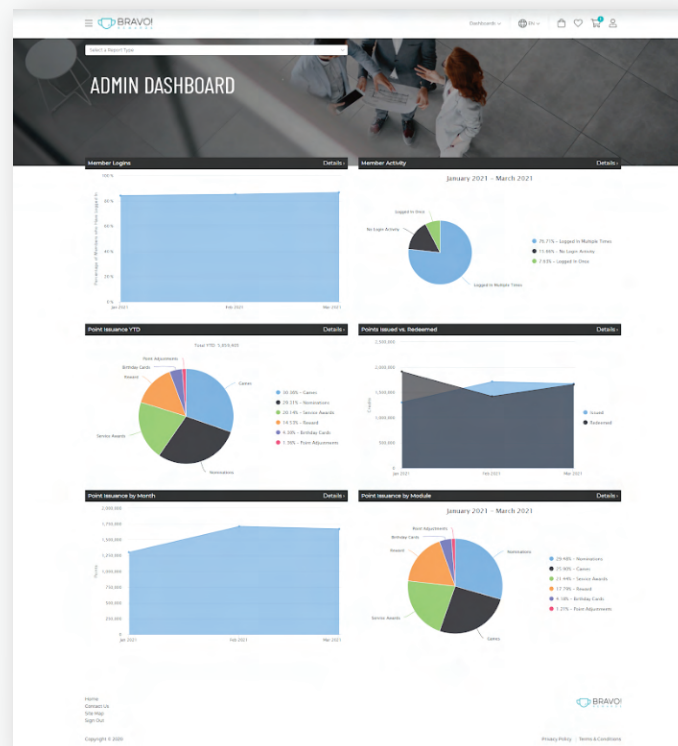

For every reward or shopping transaction, we are funding the planting of 5 new native trees around the globe, in conjunction with Eden Reforestation Project. Building a better world is our ultimate motivation.

ADOPT, LAUNCH, ENGAGE

What our customers have to say...

"What I love about Summit's approach is that they don't just build the software and rewards catalog, but they focus on engaging the people into the program. They built an initial launch campaign and an ongoing communications plan to help our organization adopt new behavior around the program as well. They are the complete package." Sr VP, Talent Management

"I was awestruck by the variety of options, from high-end brands to experiences like shows and sports, not to mention...the travel!! I feel like a rockstar with this level of recognition for my achievement. Thanks Boss!" Recipient
